| **DESCRIPTIONS** |
|---|
| SIL-JM80 |
| SEALANT JM 80 Mastic silicone neutre 780g |
| Neutral Silicone Sealant JM 80 |
| It is single component, neutral curing, high modulus and fast curing silicone sealant, which has good extrudability and thixotropy in the temperature range of 4°C to 40°C |
| **Applications** |
| · Aluminum alloy doors and windows, PVC profile for doors and windows, wood doors and windows, steel doors and windows and other joints sealing.<br>· Door and window glass assembly sealing<br>· Good adhesion to glass, aluminum, mixed soil and other building substrates. |
| **Shelf life** |
| 12 months. |
| **Characteristics** |
| · Good adhesion to the surface of most building materials.<br>· Good weather resistance, ageing resistance, ozone resistance, UV resistance and high and low temperature resistance property, which is an ideal weather-proof sealant material. |
