Ear Plug Dispenser

Marque: NORTH

Ref Product: wire:280000

Ref Mcmining: ORE280000-NORTH

Description	Ear Plug Dispenser for DeciDamp2 and Deci4200 Ear Plugs The new North ear plug dispenser allows users to do away with dispensers that jam or dispense several plugs at a time. Jammed dispensers result in wasted time and inefficiencies at the dispensing site. Ear plugs are dispensed directly into the hand of the user, thereby eliminating the possibility of ear plug contamination. Ear plug refills are sold in containers of 500 pairs of loose ear plugs. Each refill is sealed for your protection with tamper evident tape. A simple push tab allows easy removal of the dispenser from the mounting bracket for refill replacement. Each dispenser comes with a wall mount bracket, and an optional tabletop stand is available. **MADE IN USA**
Features and Benefits	â€¢ Patented mechanism dispenses one plug at a time - less wasted time at job site, no wasted plugs which saves money. â€¢ Plugs dispensed directly to the user - reduces possibility of plug contamination. â€¢ Dispenses either DeciDamp2 or Deci4200 ear plugs - greater flexibility, same dispenser for either plug. â€¢ "Snap" on/off refill - quick, easy replacement; saves user time and money. â€¢ Dispenser comes with wall mount (table top stand optional) - convenient; quick and easy access to a fresh pair of ear plugs. â€¢ Locking tab on wall mount - cannot dislodge from bracket. â€¢ Refill sealed with tamper evident tape - safe and secure.
