CIRCUIT BREAKER LOCKOUTS

Marque: NORTH

Ref Product: wire:CB01

Ref Mcmining: LOCKCB01-NORTH

Specification:	C-SAFE™ CIRCUIT BREAKER LOCKOUT the new C-SAFE circuit breaker lockouts are now available for either single or double pole circuit breaker lockout applications. A single pole lockout, CB01 requires a switch breaker with a recessed hole in it. Our single pole breaker lockout requires a single toggle with a recessed hole in it. 1- To install, simply open the lock by sliding the base of the lock backwards. 2- Place over the toggle, making sure that the small pole inside the lockout device is now inserted into the hole of the toggle. Close the lockout by pushing the base foward after ensuring that the holes are aligned. 3- You are now ready to install your lock. This model will accommodate breakers up to 9/16" (14mm.) in width. Remember, the breaker must be in the "off " position before installing **MADE IN USA**
