Saw blade - Stationary saw blades DeWALT for DW716

Marque: DEWALT

Ref Product: wire:DT4210-QZ

Ref Mcmining: DEWALTDT4210

Product strengths
For fast cutting in soft and hard natural woods
Alternating tooth geometry and positive and negative angles are these tooth saw blades particularly suitable for fast format cuts
Specially designed for use in wood, wood composites, plastic and aluminum, they are a unique combination exemplary precision, excellent finish and long life
Ideal for table and KappsÃ¤gebetrieb
For the series EXTREME series DEWALTÂ® qualities come from each higher hardness for use and guarantee the highest quality cut at the same maximum level paths.
The impact resistant carbide teeth reduce the chances of chipping or breaking a tooth if it hit a foreign object
The utra sharp carbide teeth mean less force is required when pushing the blade through the timber
SPECIFICATIONS
Diameter : 305 mm
Bore : 30 mm
Plate Thickness : 1.8
Kerf : 2.6
Teeth : 32
Grind : ATB
Rake Angle : -5 Â°
