Technical sheet

Life jacket: Inflatable life jacket

Marque:

Ref Product: wire:ZHAQYT-1013

Ref Mcmining: GILSAUVZHAQYT-1013

Material:	TPU nylon composite
Specification:	Inflation: With automatic or manual inflation device, CO2 cylinder, oral inflation tube, outer cover ... - Automatic inflation In immergent situation when falling into water, it can be inflated by the automatic inflation device within 5 seconds, - manual inflation By manualy pulling the toggle as to ensure safety of drowning people. Lite weight, comfortable, easy to use Single air chamber
Technical parameters:	
- Weight:	1.2 Kg
- Freeboard:	More than 100mm
- Inflation time:	=< 5 seconds
- Float duration	24 h
- Buoyancy	>150N
- Buoyancy loss after 24 h	=< 5%
- Embiant temperature for use	-30°C to 65°C
- Validity	3 years
Certification	CE (by GERMANICHER LIyod AG) European standard ISO 12402-3
